2-4 Supported Interface

USB, Serial, Bluetooth, Wi-Fi

2-5 Supported Web Browser

jQuery and XmlHttpRequest Object-enabled web browsers

Recommended Browsers

- Chrome
- Edge
- Internet Explorer 11
-

2-6 Supported printer models

PV3
PV4

3. mPrint Server Installation

3-1 Overview

- You can install the mPrint Server and set up the printer to be connected to the PC, and enable the necessary settings to run the web server included in the mPrint Server.

3-2 Installation and Uninstallation of mPrint Server

3-2-1 Installation

- 1) Run the Software_mPrint_Server_Setup_Vx.x.x.exe file and follow the prompts to proceed with the installation.
- 2) After completing installation, click 'Finish'.

- 3) Please run 'mPrint Server.exe' registered in the desktop or start menu.
- 4) If a firewall setting screen is displayed as below, click 'Allow access'.

If you do not allow access at the firewall, the mPrint Server may not operate normally.

5) The following screen is displayed as the mPrint Server is running.

3-2-2 Uninstallation

Exit the currently running mPrint Server before uninstalling the mPrint Server.

To exit the mPrint Server, right-click on the tray icon at the bottom right of the screen and Click 'Exit'.

Caution

If you do not exit the mPrint Server, it will not be uninstalled normally.

- 1) Select 'Uninstall SATO mPrint Server' from 'Start' - 'Programs' - 'SATO mPrint Server' or delete 'SATO mPrint Server' from 'Control Panel' - 'Add / Remove Programs'. When the uninstallation screen is displayed, follow the prompts and click the button.

- 2) In case of normal uninstallation, the following message window appears. Click "OK."

Note

Default installation path : C:\SATO\mPrint Server

3-3 Printer Settings

- You can set the printer to be used by mPrint Server. The printer must be connected to a PC running the mPrint Server. You can add a printer and modify/delete settings of registered printers.

3-3-1 Add printer

1) Click 'Add Printer'.

Specify 'Logical name', configure the communication settings of the connected printer, and click 'Save'.

The screenshot shows the 'Add Printer' dialog box with the following configuration:

- Device name: PV3
- Logical name: Printer1
- Get Information button
- Interface type: Bluetooth (selected)
- Communication setting:
 - Port: COM8
 - BaudRate: 9600
 - Databits: 5
 - Parity: NONE
 - Stopbit(s): 1
 - Flow Control: DTR/DSR
- Buttons: Test Print, Save, Close

Caution

- If 'Printer Type' is different from the connected printer, it may not operate normally. Choose the right product for your SATO product line.
- If 'Logical name' is not specified, the printer cannot be used in web application.
- If USB is selected when there is no USB connected printer, the message 'No printers connected' is displayed and 'Serial' is selected.

2) If you click 'Search' button for 'Ethernet' communication setting, the IP address of the printer in the same network with the PC is displayed. If the printer's IP is not displayed, you can enter it manually.

Name	Description
Printer Type	The printer type is displayed.
Logical name	The name of the printer to which the web application will request printing.
Device name	The name of the physical device.
Interface type	Interface of the connected printer.
Port	USB: Display the name of the connected printer or USB information. Serial or Bluetooth: Select COM port. LPT: Select LPT port. Ethernet: IP address.
Test Print	Print test of the currently connected printer.

3) After completing the printer setup, the list of registered printers appears as below.

3-3-2 Delete printer

Select the printer to be deleted from the printer list, and then click 'Remove Printer'. The selected printer will be deleted from the list.

3-3-3 Modify printer settings

Select the printer to be modified from the printer list and click 'Printer setting'. The same screen as 'Add printer' is displayed.

3-3-4 Print test

Select the printer to be tested from the printer list and click 'Test Print'. Check whether the printer prints, or not.

Caution

If printing does not work, check the communication settings.

3-4 mPrint Server Configuration

- You can configure the mPrint Server.

SATO mPrint Server **V1.0.0**

Category	Printer Name	Logical Name
Mobile Label Printer	PV3	Printer1

Add PrinterRemove PrinterPrinter setting

Test PrintmPrint Server SettingClose

Caution

The mPrint Server setting is applied when re-running after saving.

3-4-1 Show window at start program

You can set whether to show the mPrint Server window. When the window is not visible, it is displayed as a Tray icon. The default is set to 'Show window at start program'.

3-4-2 Set the listening port

You can set the listening port of the mPrint Server. Listening port is the port number on which the mPrint Server handles data requests of the web application. The default value is 18080.

- Please restart mPrint Server after changing Port.
- To exit the mPrint Server, right-click on the tray icon at the bottom right of the screen and Click 'Exit'.
- If you do not restart the mPrint Server, the changed port may not be applied.

3-4-3 Check duplicated request

If a web browser requests duplicated data, it can be checked by the mPrint Server. The default value is 'Uncheck duplicated request'.

3-4-4 Log

You can record the log of mPrint Server. The default value is 'disabled'.

The log file is located in "C:\SATO\mPrint Server\Log"

4. mPrint Server Notes

4-1 Overview

- This is for running the mPrint Server and for existing Web Driver users.

4-2 mPrint Server Precautions

4-2-1 Port Number Duplicate

- 1) If another application uses the same port number as the port number used by the mPrint Server, the following message is printed and the program will not run.

- 2) Change the ListenPort value of the mPrintBrowser.ini file in the mPrint Server installation folder, or exit another application that uses a duplicate port number.

Note

- From mPrint Server, the default listen port is 18080.
- Be careful not to duplicate with other programs.

Caution

Some semiconductor devices are easily damaged by static electricity. You should turn the printer "OFF", before you connect or remove the cables on the rear side, in order to guard the printer against the static electricity. If the printer is damaged by the static electricity, you should turn the printer "OFF".
