

3 POWERFUL WAYS TO UNLOCK SEAMLESS PRINTING WITH SOS

Smarter. Secured. Connected.
Discover what's new in SATO Online Services.

01

MONITOR PRINTHEAD CONDITION IN REAL TIME

Our new Printhead Resistance feature lets you track printhead wear accurately so you can replace it at the right time, not too early, not too late. This helps improve efficiency and supports optimal print quality.

02

SECURE ACCESS WITH SATO ID AUTH

SOS now integrates with SATO ID AUTH, giving you single sign-on access to all SATO cloud services. Manage user accounts centrally and strengthen security of your printing operations.

SATO ID AUTH

03

INTEGRATE WITH YOUR ECOSYSTEM VIA SOS API

Want your SATO printers to talk to other platforms? Now they can. The new SOS API allows you to connect SOS with third-party systems, starting with CipherLab's ReMoCloud. This provides centralized visibility across both SATO and CipherLab devices. More integrations are on the way.
